Chapter 1

Project Schedule

This chapter is dedicated to the project schedule. For each part of the project we report in a table the deadline, (not necessarily) a probably initial date, the description and the division among the team members (who are the authors of this document), identified by the following characters: '**L**' for Luca Luciano Costanzo and '**S**' for Simone Disabato.

To clarify the deadlines, we suppose that we have at our disposal about 20-25 hours per week to work at the project development[1].

Initial Date	Deadline	Worker(s)	Description
October 2015	6th November 2015	L , S	Requirements Analysis and Specification Document (RASD) and Project Planning[2].
7th November 2015	4th December 2015	L, S	Design Document (DD).
4th December 2015	6th January 2016	L , S	Working on other assignments.
6th January 2016	18th January 2016	L , S	Integration Test Plan Document (ITPD).

[1]Note that the value 25 hours per week is the same used in the **??** to calculate the required person-month.

[2]In a real project the Project Plan should be written in parallel with the RASD.

Initial Date	Deadline	Worker(s)	Description
	3rd March 2016	L , S	Politecnico Exams
4th March 2016	to be defined (value A)	L	Development of the Database structure and of the DataBase Management Service.
4th March 2016	to be defined (value B < A)	S	Development of the part of the System controller concerning the users (creation and identification)
B	to be defined (value C A?)	S	Development of the System Security Manager.
C = A	D	L , S	Unit Tests of the part developed by the other team member. Application of the Integration Tests available on the developed components. Correction of code errors.
D	E	L , S	Development of the Client and User Handler, with Unit Test in parallel.
